

gol A very special trip ! gol

Go, teachers, go! has created this product especially for you: a time capsule to keep your dreams in. This capsule has a very special format: It's a spacecraft!

Each set has an envelope (not available in the digital version), 2 stickers, 3 A4 sheets y 1 A3 sheet. With all this you will be able to generate a time capsule, and from the time capsule, a spacecraft and a landing runway.

What is the goal of 'Time Capsule'?

Develop the time capsule idea and apply it to the joy of starting a new course and fulfilling our learning wishes. We also want to be by your side in your writing and reading process.

When should we use this project?

It's recommendable to use this project in two different occasions. The farther these occasions are separated from each other, the more special this project will be come.

Perfectly would be the beginning and end of the course, especially in the first years of primary school. But the choice of when to use it is completely yours.

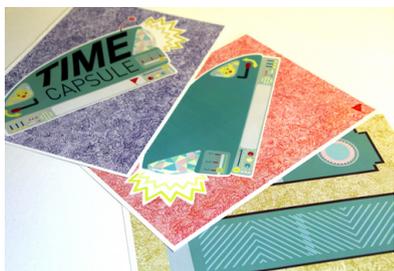

How does 'Time Capsule' work?

Occasion 1

As in every 'Time Capsule' we have to select our information: What do we want to keep in this time capsule?

We have prepared three different sheets: one, to draw the outline of the hand, another to draw the outline of the foot and another one to write our height, weight,

favourite food and learning goals... Once completed, we have to put our sheets into a fantastic envelope decorated with a 'Time Capsule' sticker that Go, teachers, go! has designed for you.

Occasion 2

After keeping this envelopes for some time (e.g, some months), we can switch over to the next phase: present all the information again on an A3 sheet. Once completed, we can open our envelope and check our information: Have we grown? Did wishes come true?

Finally, with the sheets of our envelope we we can build a spacecraft, which landing runway is the A3 sheet. Yay!

Why do we recommend to read the story 'The Magical Seed' for this project?

'The Magical Seed' is a story based on the project of the time capsule, which deals with the emotions and difficulties of a girl that wants to be able to read. Wishes, as the author says, are like seeds that have to be planted, watered and be taken care of to give their fruits. We think that 'The Magical Seed' can be an inspiring story, so that girls and boys become aware of their expectations and learning processes

We wish you a nice harvest!

The Go, teachers, go! team.
